DETAILED ACTION

1. Claims 1-20 are presented for examination.

2. This office action is being re-mailed in response to Applicant's petition indicating that the previously mailed office action was not received by Applicant's representative.

Claim Rejections - 35 USC § 102

3. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

- 4. Claims 1-6, 9-12 and 14-20 are rejected under 35 U.S.C. 102(b) as being anticipated by Sheridan[U.S. Pat. No. 5760917].
- 5. As to claim 1, Sheridan teaches the invention as claimed including: an information distribution device [20, Fig.3] which is connected with a plurality of terminal devices which belong to a group, and from which identical information is distributed to said terminal devices [e.g., 40A 40N, Fig.3], comprising:

a first storage portion for storing terminal information including an address of each terminal device belonging to said group [Figs. 1-2, col.4, lines 17-33, wherein a user may designated a group of (third party) terminal devices to whom the photographs would be shared];

a first receiving portion for receiving, from a terminal device belonging to said group [e.g., 202, Fig.1], a distribution request including access information and distribution destination information, said access information being required for accessing distribution information for distribution to one or more of said terminal devices belonging to said group, said distribution destination information specifying a distribution destination terminal device belonging to said group [col.4, lines 48-67; col.5, lines 7-18];

a second receiving portion for accessing said distribution information stored in a content server [e.g., any of 2A-2N, Fig.3] which exists outside of said information distribution device, based on said access information included in a distribution request received by said first receiving portion, and for receiving the distribution information [col.5, lines 31-42; note that the the low-resolution images are derived from high resolution images originated in the scanner stations];

a second storage portion for storing said distribution information received by said second receiving portion [i.e., the low-resolution images are stored in central image server (20, Fig.3)]; and

a first transmitting portion for judging whether a terminal device specified by said distribution destination information included in a distribution request received by said first receiving portion is an address of a terminal device included in said terminal information stored

Art Unit: 2154

in said first storage portion, and for distributing said distribution information stored in said second storage portion [col.5, lines 31-42].

Page 4

- 6. As to claims 2-3, Sheridan further teaches that the system further comprising a third receiving portion for receiving a bill of charges from a device, said device billing for said distribution information charges when said distribution information is chargeable; and a second transmitting portion for transmitting said bill of charges received by said third receiving portion either to a terminal device which transmitted said distribution request or to a telecommunications carrier to which this terminal device subscribes [note that inherently there must be a billing process in the system to charge the original film processing and printing fee].
- 7. As to claim 4, Sheridan further teaches that the system further comprises a deleting portion for deleting said distribution information stored in said second storage portion after the distribution of said distribution information by said first transmitting portion [col. 3, lines 8-15].
- 8. As to claim 5, Sheridan further teaches transmitting notification, to the terminal device which transmitted said distribution request, of the fact that distribution has been completed, after the distribution of said distribution information by said first transmitting portion [col.6, lines 13-24].
- 9. As to claim 6, Sheridan further teaches that said distribution request further includes additional information added to said distribution information, and said first transmitting portion

Application/Control Number: 09/919,204 Page 5

Art Unit: 2154

distributes said additional information in addition to said distribution information [col.5, lines 19-42].

- 10. As to claim 9, Sheridan further teaches that said first receiving portion receives said distribution request from said terminal device via another server device [note that Sheridan's system is inherently able to receive terminal device transmitted via an ISP server because Sheridan's system is tied to the Internet (205, Fig.1)].
- 11. As to claim 10, Sheridan further teaches that said distribution information is either a program including a game program, said program and a license for said program, map information, or product information [note that photograph is a product information].
- 12. As to claims 11-12 and 14-20, since the features of these claims can also be found in claims 1, 6 and 10, they are rejected for the same reasons set forth in the rejection of claims 1, 6 and 10 above.

Claim Rejections - 35 USC § 103

13. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.

Art Unit: 2154

14. Claims 7-8 and 13 are rejected under 35 U.S.C. 103(a) as being unpatentable over

Sheridan [U.S. Pat. No. 5760917], as applied to claims 1-6, 9-12 and 14-20 above, further in

view of Official Notice.

15. As to claim 7, Sheridan does not specifically teach that said distribution request further

includes a distribution time for specifying a time for distributing said distribution information,

and said first transmitting portion distributes said distribution information at said distribution

time.

However, Official Notice is taken that distributing information according to planned

schedule is well known in the art. It would have been obvious to one of ordinary skill in the art at

the time the invention was made to allow users of Sheridan's system to specify timing constraint

or delivery time as an option because such feature serves good customer service, in particular

when distribution of certain photos is time-sensitive.

16. As to claim 8, Sheridan further teaches that said terminal device information stored in

said first storage portion includes information for representing an information format displayable

on a display portion of the terminal device [220, Fig.2].

Sheridan does not specifically teach that said information distribution device further

comprises a conversion/filtering portion for converting or filtering said distribution information

to a format capable of being displayed on a display portion of said terminal device, based on said

information for representing said displayable information format.

Page 6

Art Unit: 2154

However, Official Notice is taken that establishing device profile regarding capabilities

of the various cleints' devices for transmitting information in a displayable format is well known

in the art.

It would have been obvious to one of ordinary skill in the art at the time the invention

was made to consider a terminal device's dispaly capability and make appropriate format

conversion in Sheridan's system prior transmission because by doing so it would enable

individuals holding different types of devices to receive appropriate information (in terms of

content and format).

17. As to claim 13, since the features of this claim can also be found in claims 1, 7 and 11, it

is rejected for the same reasons set forth in the rejection of claims 1, 7 and 11 above.

18. The prior art made of record and not relied upon is considered pertinent to applicant's

disclosure: Watanabe et ak. [U.S. Pat. No. 6578072].

Conclusion

Examiner note: Examiner has cited particular columns and line numbers in the references as

applied to the claims above for the convenience of the applicant. Although the specified citations

are representative of the teachings of the art and are applied to the specific limitations within the

individual claim, other passages and figures may apply as well. It is respectfully requested from

the applicant in preparing responses, to fully consider the references in entirety as potentially

Page 7

Art Unit: 2154

teaching all or part of the claimed invention, as well as the contest of the passage as taught by the prior art or disclosed by the Examiner.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Wen-Tai Lin whose telephone number is (571)272-3969. The examiner can normally be reached on Monday-Friday (8:00-5:00).

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, John Follansbee can be reached on (571)272-3964. The fax phone numbers for the organization where this application or proceeding is assigned are as follows:

(703)872-9306 for official communications; and

(571)273-3969 for status inquires draft communication.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see http://pair-direct.uspto.gov. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free).
